

AGENDA
Interior Columbia TRT Meeting
September 16-18, 2003
525 Oregon St. – Willamette Room

September 16, 2003 – Work group sessions 1:00 pm – 4:30 pm

Subgroup -- Viability goals

Discussion of alternate indices (productivity)

Data set development/progress

Subgroup -- Case studies

Continue discussion/development of approaches to limiting factors assessments

Subgroup – Genetics/pop id

Outline paper(s) for publication from pop id efforts

September 17, 2003 – Full TRT meeting 8:30 am – 5:00 pm

Viability Goals Discussion Topics

Draft outline for viability document (v.1)

Population abundance/productivity –

Strengths and weakness of approaches

Key components of potential approaches

Population Change based – estimating variance

S//R and trend based – Indices of marine survival

All - Historic capacity reconstruction methods

Other?

Task assignment to fill out missing pieces of that discussion

Population-level spatial structure/diversity criteria

ESU viability

Draft Intro and objectives statement

Strata/recovery unit

Productivity/abundance criteria

Assignments and schedule: draft Pop/ESU Viability Criteria Report

September 18, 2003 – Full TRT meeting, 8:00 am – 2:00 pm

Limiting Factor Analysis Discussion Topics

All Limiting Factors Analyses – identify “steps” for complete analysis

Habitat Limiting Factors

Center proposal – identification of strengths, weaknesses, needed changes

Comparative study

All-H Limiting Factors Analysis

Determine initial approach(es) to all-h analyses
